

Let's face it!

Seen from the front, the head is egg shaped.
Draw guide lines A - I then draw the egg shape as indicated.
Then draw in the basic shapes of eyes, nose, mouth and ears.
The proportions of the face with these lines in position are classic portrait guidelines.

Have fun, and try to move the guidelines around!

See what shape head you make, it doesn't have to look real...
as well as being the basis of portrait drawing it's also used to
make cartoon faces.
