

# 05. FELT TIP PEN & COLOUR

Simply doodle any shape using a felt tip pen. When you've finished add more shapes - you may be able to see images in the drawing - faces, eyes, trees, etc. Work on these areas to define the detail.

This doodle example was produced in 1969 as a preliminary sketch for a final piece of artwork over 2 meters high that is now exhibited in the offices of an international power company in London.

Creating the most basic doodles can produce stunning effects and can be great fun. Don't settle on your first doodle - try lots - draw upside down or with your eyes shut!
