## First Rail Support – special projects

First Rail Support provides bus services for a variety of special projects. For the Commonwealth Games – the biggest multi-sport event in the UK - we operated 110 of our own vehicles and 40 subcontracted vehicles for busy days.

We successfully delivered a new depot, maintenance contracts, management structure and driver team from around the UK. The project was carried out in an intense media spotlight and was so successful that it won commendations and awards.

As a result of the success of the Commonwealth Games project, we also advised the Athens Olympics and Sydney Commonwealth Games on transport matters.

We also provide bus services for major shows such as the Farnborough International Airshow where a bespoke shuttle service was successfully operated between external car parks and the showground.
