## About Nexus

We look after public transport in Tyne and Wear. We own and operate the Metro, and employ anyone who works on the Metro.

The Metro is as a light railway system and serves Newcastle, Gateshead, North Tyneside, South Tyneside and Sunderland.

One of the most significant changes in transport is the increasing use of the private car, quite often for journeys that could be made some other way.

Our job is to improve the quality and quantity of public transport. We help those who don't have cars and try to attract car users for some of their journeys.
