

Factsheet

Jobs at train stations 2

Train announcers

Our train announcers tell you where trains are arriving and departing. They let everybody know when there is a platform change or when a train is going to be delayed or cancelled.

In some stations they also have cameras to view what is going on at the station.

Rail operators

Our rail operators work at smaller stations doing a variety of jobs. They sell tickets from ticket machines, keep platforms clean and help customers.
