About Southern

Southern is one of the many train operating companies providing train services in the UK.

We operate train services throughout Sussex, Surrey and South London and also to parts of Hampshire and Kent.

Our 3,500 staff manage 160 stations and operate and maintain a mix of over 1000 new and refurbished carriages seven days a week and up to 24 hours a day.

We carry 170,000 passengers every weekday, adding up to around 130 million passenger journeys a year.

Over the past few years Southern has spent a massive £1 billion to make our services better for our passengers.

We bought nearly 750 new carriages, refurbished our other carriages, renovated our engineering depots, installed new ticket machines, improved our stations and provided better information and security systems.

We have also invested in our staff to help them provide better customer service to our passengers.
